PROFESSIONAL SUMMARY

IT and technical operations professional with 3 years of DevOps/IT experience, plus experience in facilities operations and semiconductor manufacturing. Skilled in troubleshooting, system monitoring, technical documentation, hardware and connectivity support, and day-to-day operations. Adaptable and self-motivated, with a practical approach to problem-solving and a willingness to learn unfamiliar systems and help others resolve issues.

TECHNICAL SKILLS

IT Support: Troubleshooting, hardware and connectivity assistance, configuration issues, user support, documentation, task tracking

Systems & Cloud: Linux fundamentals, AWS EC2/S3/CloudFront, Terraform fundamentals, NGINX, DNS concepts

Tools & Monitoring: Docker, Docker Compose, Kubernetes fundamentals, Jenkins, Git, Bash, Grafana, Prometheus, Uptime Kuma, Jira, Confluence

PROFESSIONAL EXPERIENCE

Software Test Engineer (Freelance) | Design Sharing Limited, Japan (Feb 2025 – Apr 2025)
- Tested software, tracked defects, validated releases, and maintained quality-assurance documentation.

DevOps Engineer cum QA Lead | Innovators Media Marketers Inc., Makati (May 2023 – Jan 2025)
- Supported CI/CD pipelines, release activities, quality assurance, AWS-hosted Redmine environments, and operational scripting; coordinated testing and documented issues to help resolve deployment and configuration problems.

DevOps Engineer (Tier 2 Support) | Innovations Group (DSSE), Pasay (Apr 2022 – Mar 2023)
- Troubleshot deployment and configuration issues and supported monitoring, incident response, and technical documentation.

Resident Female Multi-Skilled Technician / Facilities Coordinator | ENOVA Facilities Management LLC, UAE (2018 – 2020)
- Coordinated maintenance requests; handled minor lighting and water-filter tasks; checked fire alarms and firefighting systems; and assisted IT staff with computer hardware, laptop setup, internet and telephone connectivity, and smartboard troubleshooting.

Facilities Management Technician | ENOVA Facilities Management LLC, UAE (2014 – 2016)
- Supported maintenance, inspections, technical service requests, and compliance documentation.

Semiconductor Wirebond Technician | AMKOR Semiconductor Company (2013 – 2014)
- Worked in semiconductor manufacturing, following production procedures and quality requirements with attention to detail.

SELECTED TECHNICAL PROJECTS

IT Infrastructure Monitoring and Incident Notification | *Personal Learning Project*
Built a monitoring setup to explore website and server availability, observe system performance, and flag potential issues through notifications. **Purpose:** Improve visibility, identify problems earlier, and reduce constant manual checking.

Website Hosting and Automated Deployment | *Personal Learning Project*
Set up a cloud-hosted website with a connected publishing workflow to practice delivering updates consistently. **Purpose:** Make website publishing more repeatable and reduce manual deployment steps.

Application Deployment and Infrastructure Setup | *Personal Learning Project*
Created a test environment for a business application and its supporting services, practicing system setup and configuration troubleshooting. **Purpose:** Understand how applications are deployed, maintained, and troubleshot in a structured environment.

EDUCATION & TRAINING

Diploma, Electronics Engineering Technology — Technological University of the Philippines–Taguig | 2009–2013

DevOps Engineering Bootcamp | 2023–2024 • Full Stack Development Bootcamp | 2022

NC II – Computer Systems Servicing | 2019 • CI/CD with Heroku | 2023
